SIA USAM X SERIES – SKU OVERVIEW

Silverlake Intel Appliance (SIA) Universal Secure Access Management (USAM) X Series is a jointly-developed appliance set, based on Intel® Software Guard Extensions (Intel® SGX) and Intel® Active Management Technology (AMT). SIA USAM X Series serves as an end-to-end comprehensive solution that acts as a formidable shield for the very sensitive layer of IT security that protects data, infrastructure and assets across an enterprise.

Designed to deliver unprecedented level of security in the cyber security space, SIA USAM X Series delivers Silverlake's cyber security products, services, support and maintenance - All in One.

SIA USAM X Series (for illustration purpose only)

The solution provides hardened security for its Privilege Access Management technology stack to help protect against cyber threats while providing more consistent service performance. Powered by Xeon processor, SIA USAM X Series is equipped to provide workload-optimised performance with advanced reliability. The solution set comprises three different models that is meticulously designed to cater to specific needs of an enterprise, regardless of the nature, size or complexity of the enterprise.

The primary SKUs of X Series: **X3 Series, X5 Series and X7 Series**, which aim to be the right solution fit for a small, mid-sized and large-sized enterprise, operating in multiple industry verticals.
