

VARIA
MULTI-FACTOR AUTHENTICATION SERVICE PLATFORM

VariA X Series Multi-Factor Authentication Service Platform (MFASP)

SKU Overview

VARI A MFASP X SERIES – SKU OVERVIEW

VariA Multi-Factor Authentication Service Platform (MFASP) X Series is a jointly-developed appliance set, based on Intel® Software Guard Extensions (Intel® SGX) and Intel® Active Management Technology (AMT). VariA MFASP X Series serves as a multi-factor authentication solution that acts as a formidable line of defence against unauthorized system access across an enterprise.

“One single vulnerability is all an attacker needs, but, with VariA, vulnerability is eliminated at every granular layer”

VariA MFASP X Series (for illustration purpose only)

The solution provides a purpose built generic standalone multi-factor authentication that provides an additional layer of authentication, in addition to your current authentication. VariA MFASP X Series is designed with Xeon processors to provide optimum performance for demanding workloads. Our offering comprises of three different models that is tailored to fit most enterprises, from basic set ups to more complex IT ecosystems.

The primary SKUs of X Series: **X3 Series**, **X5 Series** and **X7 Series**, which aim to be the right solution fit for a small, mid-sized and large-sized enterprise, operating in multiple industry verticals.
